

Scalable technology solutions for

Truck and Body Builder/ Fabricators

Save time, streamline operations and increase profits.

Boost productivity with Epicor Software's *Make-to-Order*, *Engineer-to-Order* and *Configure-to-Order* manufacturing capabilities. Specific functionality to save time and money include:

DRIVE REVENUE & INCREASE PROFITABILITY

Manage services operations and parts sales with a full suite of tools to improve your bottom line for efficiency.

Sales Configurator: Eliminate errors that originate in incompatible options – give sales people the ability to leverage engineering rules while pricing and configuring the product.

Engage Dealers and customers with a portal for parts, warranty and online ordering.

Understand profitability by order at time of quote and order through to delivery in real time.

STREAMLINE & OPTIMIZE OPERATIONS

Cut and paste or import parts from drawings: speed the work order package and material planning cycle.

Configurator driven engineered options. For quoting and orders –allowing you to launch the Job immediately.

Job scheduling: Schedule the shop and the individual operations for each order. See the impact before you take an order. See the impact and bottleneck based on staff available and work to be completed.

TECHNOLOGY TO KEEP YOU AHEAD

Cad Interface for importing the BOM direct from CAD.

As built configuration: Always see what the specific VIN number record of materials and components that were included in the build.

Service & CRM Module: as customers return for service you will be able to track the equipment for life and recall or market enhancements to existing customers.
